WHEREAS, programs and projects of the Department of Social Welfare and Development (DSWD) constitutes most of its high profile and important projects that mirrors the current Administrations thrust and priorities plans to achieve the societal goal of improving the well-being of the common citizens. These programs with the help of an Information Systems (IS) directly translate to the delivery of social services that most of the DSWD's clients receives.

Currently, the DSWD's Back End Systems (BES) are composed of 103 servers, 45 storage systems, three (3) data centers and one (1) remote data center.
